DETAILED ACTION

Election/Restrictions

Claims 2-9 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 11, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by McClanahan et al. (McClanahan US 5,628,578).

Regarding claims 1, 11, and 12 McClanahan discloses a yoke-and-shaft coupling structure comprising, a yoke (14) including a shaft coupling portion which has a U-shaped end face (52), and a shaft (12 and 16 form the shaft) to be inserted into inside of the shaft coupling portion through a U-shaped opening portion, wherein the shaft coupling portion includes a recessed portion (the area of the inner wall between 68 and 70) for positioning the shaft in both axial directions, and the shaft includes a salient portion (the area of 24 between 42 and 44) to be inserted into the recessed portion when the shaft is inserted into the inside of the shaft coupling portion, wherein the shaft is shiftable between assembled and disassembled positions.

Art Unit: 3679

Claims 10, 11, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Kamikawa et al. (Kamikawa JP2000297823).

Regarding claims 10, 11, and 12 Kamikawa discloses a yoke-and-shaft coupling structure comprising, a yoke (3) including a shaft coupling portion which has a U-shaped end face (11), and a shaft (5) to be inserted into inside of the shaft coupling portion through a U-shaped opening portion, wherein the shaft coupling portion includes a recessed portion (10) for positioning the shaft in both axial directions (the front wall and inclined rear wall providing limits to axial movement), and the shaft includes a salient portion (13 and 15) to be inserted into the recessed portion when the shaft is inserted into the inside of the shaft coupling portion, wherein the shaft is shiftable between assembled and disassembled positions.

Response to Arguments

Applicants' arguments filed 10/2/2006 have been fully considered but are not persuasive.

Applicants argue that McClanahan fails to disclose one of a fixed projecting portion and a recessed portion of the shaft coupling portion position the shaft in an axial direction in both directions along the axis of the shaft. Examiner disagrees. The alternate interpretation of McClanahan as set forth in the present rejection sets forth the area of 24 between 42 and 44 as the salient or projecting portion and the area of the inner wall of the yoke between 68 and 70 as a recessed portion. When assembled, the interaction of these structures prevents any purely axial movement of the shaft.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel J. Mills whose telephone number is 571-272-8115. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel P. Stodola can be reached on 571-272-7087. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
